Configuring Domain astra.in to Point to WIX Static Page

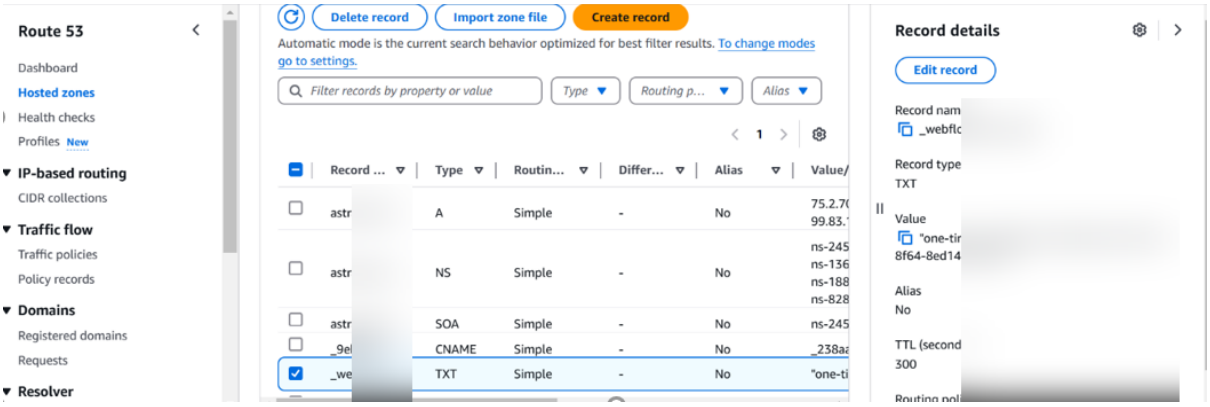
Domain: astra.in

Requirement: The client built a new static page on WIX and requested that this page become the primary content for the domain astra.in. Previously, this domain was used as the production domain for the EO Application. As per the new requirement, the domain should point to the WIX static page.

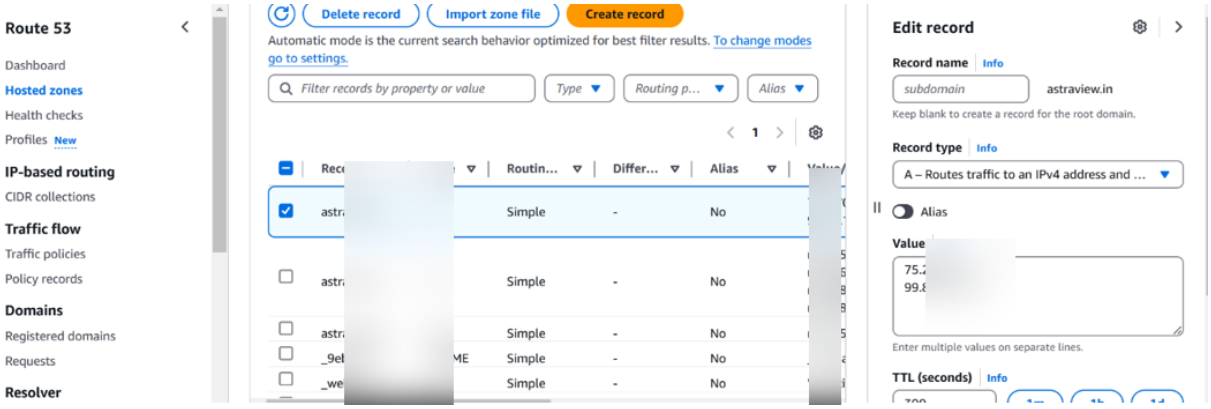
Objective: Update the domain configuration in Route 53 to redirect astra.in to the WIX static page, making it live and accessible directly via the domain.

Provided Information: The client shared the following DNS records that needed to be added to configure the domain correctly:

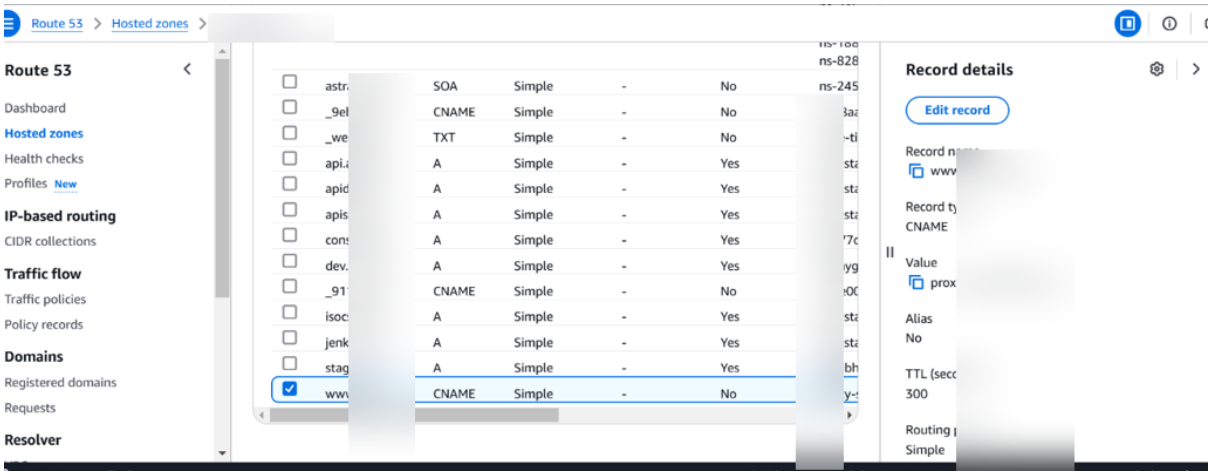
1. **TXT Record:**
   - **Type:** TXT
   - **Name:** _webflow
   - **Value:** one-time-verification=fca03a59- 8ed14**********



2. **A Records:**
   - **Type:** A
   - **Name:** @
   - **Value:** 1111111
   - **Value:** 99.88.188.090



3. **CNAME Record:**
   - **Type:** CNAME
   - **Name:** www
   - **Value:** proxy-ssl.webflow.com



Steps Taken:

1. **Analyzed the Existing Configuration:**
   - Confirmed the current setup of astra.in in Route 53 and verified its role in hosting the EO Application.
2. **Verified Client Requirements:**
   - Ensured the provided records were accurate and met the WIX integration guidelines.
3. **Updated DNS Records in Route 53:**
   - Added the TXT record for verification:
     - `_webflow.one-time-verification=fca03a59-**********`
   - Added the A records pointing to the specified IP addresses:
   - **Value:** 1111111
   - **Value:** 99.88.188.090
   - Added the CNAME record for the `www` subdomain:
     - `proxy-ssl.webflow.com`
4. **Verified the Setup:**
   - Waited for DNS propagation to complete.

- Confirmed that the domain astra.in and www.astra.in were resolving to the WIX static page successfully.

5. **Final Validation:**
    - Accessed astra.in from multiple locations to ensure proper resolution and accessibility.
    - Checked for any errors or misconfigurations in the DNS settings.

Outcome: The domain astra.in was successfully updated to point to the WIX static page, meeting the client's requirement. The new static page is now live and accessible via astra.in and www.astra.in.
